AMERICAN PULLMAX COMPANY, INC.

7720 GROSS POINT ROAD

967-7800

SKOKIE, ILLINOIS

IN CANADA: **PULLMAX CANADA, LTD.**

South Service Road, Oakville, Ontario
 P. O. Box 460

41-3M-5-65-C&P

There's a PULLMAX machine for every size shop and purpose

Pullmax offers the largest and most complete line of metal working machines . . . 10 different models work the lightest material to a full 13/32" capacity. More jobs can be done on a Pullmax, economically and easily.

PULLMAX model P-2

- 1/8" capacity Mild Steel
 - *For the small sheet metal shop
 - *Trade and School Training Shops
 - *Engineering Department
- The frame is of welded box frame construction with 31" throat.
- *Will perform all twelve standard Pullmax operations.

PULLMAX model P-3

- 5/32" Capacity Mild Steel
 - *For the small sheet metal shop
 - *Trade and school training shops
 - *Engineering department
- The frame is of welded box construction with 42" throat for handling of larger sheets.
- *Will perform all twelve standard Pullmax operations.

PULLMAX model P-5/2

- 7/32" Capacity Mild Steel
 - *Sheet metal fabricating shop
 - *Trade and school training shops
 - *Engineering department
 - *Maintenance shops
- Will do the work of the previous P-2 and P-3 machines, plus up to its own capacity. The most popular in the PULLMAX line.
- *Will perform all twelve standard Pullmax operations—plus 6 lock-forming operations—18 in all!

PULLMAX model P-6

- Edge cutting capacity 1/4" mild steel
 - *For sheet metal and fabricating shops
 - *Maintenance Shops
- A heavy duty machine, ideal for all sheet metal work. Works the lightest material to full 1/4" capacity. All the latest features of our newly designed models.
- Equipped with 2-speed motor and thereby can be converted to 1/8" capacity nibbler.

CAN BE EQUIPPED WITH NEW UNIVERSAL ATTACHMENT

PULLMAX model P-8

- 5/16" capacity Mild Steel
 - *Sheet Metal and Heavy Fabricating
 - *Engineering Department
 - *Maintenance Shops
- A heavy duty machine covering the full range of sheet metal. With its added speeds and stroke lengths, it is capable also of doing the work of all previous models. Equipped with 2-speed motor and thereby can be converted to 3/16" capacity nibbler.

CAN BE EQUIPPED WITH NEW UNIVERSAL ATTACHMENT

12 Standard Cutting and Forming Operations

6 LOCK FOLD OPERATIONS

Pullmax Lock Fold Attachment does the six most popular shapes in the sheet metal trade.

1 STRAIGHT CUTTING

4 IRREGULAR or FREEHAND

7 LOUVER CUTTING

10 EDGE BENDING

2 CIRCLE CUTTING

5 SLOT CUTTING

8 BEADING

11 FLANGING

3 INSIDE SQUARE CUTTING

6 NIBBLING

9 JOGGING or OFFSETTING

12 DISHING

PULLMAX 16mm SOUND FILM

A 16mm sound film is available for your use. It shows many jobs for which PULLMAX is famous. Your engineering and planning departments will get a lot out of this film to help solve their problems. Running time, 35 minutes.

PULLMAX Mobile DEMONSTRATION Unit

Now PULLMAX Sales Engineers are all equipped with a PULLMAX Shearing Machine and an X-8 Plate Beveler in a truck. They will gladly come to your plant and give a complete demonstration of all PULLMAX operations. You have to see a PULLMAX to appreciate and understand how versatile it is.

There's a PULLMAX machine for every size shop and purpose

Pullmax offers the largest and most complete line of metal working machines . . . 10 different models work the lightest material to a full 13/32" capacity. More jobs can be done on a Pullmax, economically and easily.

PULLMAX model P-5/2

7/32" Capacity
Mild Steel

- *Sheet metal fabricating shop
- *Trade and school training shops
- *Engineering department
- *Maintenance shops

Will do the work of the previous P-2 and P-3 machines, plus up to its own capacity. The most popular in the PULLMAX line.

*Will perform all twelve standard Pullmax operations—plus 6 lock-forming operations—18 in all!

PULLMAX model P-9

3/4" Capacity
Mild Steel

- *Maintenance shops
- *Sheet metal and fabricating shops
- *Construction work
- *Boiler and tank shops

A truly heavy duty machine for metal fabricating. With a two speed motor. Can be converted to a 1/4" capacity nibbler.

CAN BE EQUIPPED WITH NEW UNIVERSAL ATTACHMENT

The Complete Line of Sheet and Plate Shearing and Forming Machines

The PULLMAX Trimmer is a machine especially designed for the aircraft, automotive and appliance industries to solve some of the more difficult trimming, cutting and forming applications in bulky materials and formed parts.

PULLMAX model P-2

1/8" capacity
Mild Steel

- *For the small sheet metal shop
 - *Trade and School Training Shops
 - *Engineering Department
- The frame is of welded box frame construction with 31" throat.

*Will perform all twelve standard Pullmax operations.

PULLMAX model P-6

Edge cutting capacity
1/4" mild steel

- *For sheet metal and fabricating shops
- *Maintenance Shops

A heavy duty machine, ideal for all sheet metal work. Works the lightest material to full 1/4" capacity. All the latest features of our newly designed models.

Equipped with 2-speed motor and thereby can be converted to 1/8" capacity nibbler.

CAN BE EQUIPPED WITH NEW UNIVERSAL ATTACHMENT

PULLMAX SPECIAL I-BEAM SPLITTER

7/16" capacity
Mild Steel

machine for structural iron work. Can also be used in boiler and tank shops for heavy duty circle cutting.

Double Duty! A Standard Machine...or...A Trimmer

PULLMAX TRIMMER/5

7/32" Capacity
Mild Steel

- *A machine designed especially for: Automotive—Aircraft and Appliance industries
- *Sheet metal shops
- *Engineering department

A heavier duty TRIMMER designed for cutting, trimming and forming in heavier metal.

PULLMAX model P-3

5/32" Capacity
Mild Steel

- *For the small sheet metal shop
- *Trade and school training shops

*Engineering department

The frame is of welded box construction with 42" throat for handling of larger sheets.

*Will perform all twelve standard Pullmax operations.

PULLMAX model P-8

5/16" capacity
Mild Steel

- *Sheet Metal and Heavy Fabricating
- *Engineering Department
- *Maintenance Shops

A heavy duty machine covering the full range of sheet metal. With its added speeds and stroke lengths, it is capable also of doing the work of all previous models. Equipped with 2-speed motor and thereby can be converted to 3/16" capacity nibbler.

CAN BE EQUIPPED WITH NEW UNIVERSAL ATTACHMENT

PULLMAX model U-10

13/32" Capacity
Mild Steel

- *Sheet metal fabricating shops
- *Construction work
- *Boiler and tank shops
- *Special application
- *I-Beam cutting

an automatic push-button machine to take the hard labor out of handling heavy materials.

Double Duty! A Standard Machine...or...A Trimmer

PULLMAX TRIMMER/6

1/4" Capacity
Mild Steel

The newest machine in the Trimmer line. Will do all Pullmax operations and Trimmer operations.

With a 2-speed motor can also be converted to a 1/8" capacity nibbler. With special attachment can be used for nibbling on tubular ends.

CAN BE EQUIPPED WITH NEW UNIVERSAL ATTACHMENT

PULLMAX model P-9

- 3/4" Capacity
Mild Steel
 - *Maintenance shops
 - *Sheet metal and
fabricating shops
 - *Construction work
 - *Boiler and tank shops
- A truly heavy duty machine for metal fabricating. With a two speed motor. Can be converted to a 1/4" capacity nibbler.

CAN BE EQUIPPED WITH NEW UNIVERSAL ATTACHMENT

PULLMAX SPECIAL I-BEAM SPLITTER

- 7/16" capacity
Mild Steel
- machine for structural
iron work.
- Can also be used in
boiler and tank shops
for heavy duty circle
cutting.

PULLMAX model U-10

- 13/32" Capacity
Mild Steel
 - *Sheet metal
fabricating shops
 - *Construction work
 - *Boiler and tank shops
 - *Special application
 - *I-Beam cutting
- An automatic push-button machine to take the hard labor out of handling heavy materials.

The Complete Line of Sheet and Plate Shearing and Forming Machines

The PULLMAX Trimmer is a machine especially designed for the aircraft, automotive and appliance industries to solve some of the more difficult trimming, cutting and forming applications in bulky materials and formed parts.

Double Duty! A Standard Machine...or...A Trimmer

PULLMAX TRIMMER/5

- 7/32" Capacity
Mild Steel
- *A machine designed
especially for:
Automotive—Aircraft
and Appliance
industries
- *Sheet metal shops
- *Engineering
department

A heavier duty TRIMMER designed for cutting, trimming and forming in heavier metal.

Double Duty! A Standard Machine... or...A Trimmer

PULLMAX TRIMMER/6

- 1/4" Capacity
Mild Steel
- The newest machine
in the Trimmer line.
- Will do all Pullmax
operations and Trimmer
operations.
- With a 2-speed motor
can also be converted to
a 3/8" capacity nibbler.
- With special attachment
can be used for nibbling
on tubular ends.

CAN BE EQUIPPED WITH NEW UNIVERSAL ATTACHMENT

PULLMAX OFFERS A REVOLUTIONARY NEW UNIVERSAL ATTACHMENT.

This attachment can be installed on the new Standard P-6, P-8, and P-9 machines.
as fast as **1-2-3-4** these machines can be outfitted with a universal attachment.

Interested in savings up to 85%? PULLMAX Quick Beveler

FASTER BEVELING PLUS STRONG-PERFECT WELD JOINTS

CUTTING SPEED 8 TO 11 FEET PER MINUTE

Pullmax X-8 Beveler bevels small pieces of plate in any shape for better welding.

Surprisingly small and compact, the X-8 Beveler needs no complicated installation.

If you are burning, grinding or chiseling a bevel on plate steel for a better electrical weld, you won't believe your eyes when you watch the Pullmax X-8 Beveler. It bevels mild, stainless, even special alloy steels in a fraction of the time you now spend.

The cutting wheel on the Pullmax X-8 Beveler both cuts and feeds the work.

X-8 BEVELER SUPPLEMENTARY EQUIPMENT

Here, the X-8 travels on an overhead track. A pneumatic turntable indexes the work to bevel on all four edges.

Special attachments and suggested plate handling equipment permit the X-8 to bevel large plates as well as tubes and channel iron.

The X-8 Machine is simultaneously pulling and bevel cutting. After cutting one edge, it is transferred by overhead crane to the opposite side and bevels the other edge, feeding the plate back to its original starting point.

This is a very simple chain hoist that supports the piece of plate being beveled.

In this operation the X-8 is mounted on a dolly that moves on a track. The overhead crane with the counterweight keeps the machine level with the work.

Special attachment for the X-8 permits beveling of tubes from 3" dia. and up.

Attachment for beveling of channel iron also available.

AMERICAN PULLMAX COMPANY, INC.
